

Futura F3B

The Futura F3B is the newest onboard validator offered by Payment In Motion. With the highest quality components, materials, and construction, the F3B is one of the most innovative products on the market. The robust 7" touchscreen has the ability to play MP3 Videos, giving the F3B a vast array of methods for interacting with customers. The F3B can process Calypso, DESFire, MIFARE, and more, as well as PayPass, PayWave, and can read NFC enabled Smartphones. The 1D/2D scanner has the ability to validate barcodes and QR codes right off the screen of a smart phone. In addition, by being PCI – EMV Certified, the F3B provides even more flexibility in Fare Collection.

Futura F3B

specifications

Microprocessor	Cortex A8 (ARM-11) @ 1,000MHz
Display and Keyboard	7" Colour TFT 800x600 ft Multi Touch Capabilities
Memory	4G internal SDHC Module
Printer	N/A
